Why choose Isotonix Advanced B-Complex?

Isotonix Advanced B-Complex is an isotonic-capable combination of the essential B vitamins with magnesium and potassium, which work synergistically to promote a myriad of health benefits and biological processes in the body. Isotonix Advanced B-Complex works to promote healthy red blood cell formation, and contains B vitamins which are necessary for proper functioning of the nervous system, bone marrow and muscle function. Vitamin B5 is involved in the Krebs cycle of energy production and plays a role in producing, transporting, and releasing energy from fats. The large amount of vitamin B12 provided in the Isotonix formula may be capable of forcing small amounts across the membranes of the intestines. This vitamin is carried into the body by forming a complex with Intrinsic Factor, a stomach derived protein. It enters the body bound to proteins, requiring an acidic pH level and proper pancreatic release of proteolytic enzymes. Because many vegetarian diets are lacking in the essential B-vitamins, Isotonix Advanced B-Complex meets the need for B-vitamins for vegetarians.

The Isotonix Advantage!

Isotonix dietary supplements are delivered in an isotonic solution. This means that the body has less work to do in obtaining maximum absorption. Isotonic products allow nutrients to pass directly into the small intestine and be rapidly absorbed into the bloodstream. With Isotonix, little nutritive value is lost, making the absorption of nutrients highly efficient while delivering maximum results.

Isotonix products also offer the fastest and most efficient delivery system of all nutraceutical supplements and are formulated using only the most advanced and scientifically proven ingredients. Isotonix products are completely free of binders and fillers common in traditional tablet and capsule products so you know that you are getting only the quality ingredients you expect.
