Why choose Oxygen Extreme?

With its strong antioxidant formula, Oxygen Extreme can help play a factor in the maintenance of good health. Its synergistic ingredients work to enhance and support multiple areas of health, including cognitive function, eye health and circulation.

In addition, by combining both botanicals and vitamins in a single product, Oxygen Extreme promotes your skin's health with both an antioxidant and herbal defense. No other product combines the variety of ingredients in Oxygen Extreme.

FAQs

How can the use of vitamins fight against free radicals?

Vitamin C is thought to protect the body against the negative effects of free radicals. Antioxidants neutralize free radicals by donating one of their own electrons, ending the electron-stealing reaction. The antioxidant nutrients themselves don't become free radicals by donating an electron because they are stable in either form. They act as scavengers, helping neutralize free radicals. Vitamin C is also the most abundant water-soluble antioxidant in the body. It acts primarily in cellular fluid. It is particularly effective in combating free-radical formation caused by pollution and cigarette smoke.

Vitamin A, a fat-soluble vitamin, helps support your body's overall antioxidant defense. Part of a family of compounds including retinol, retinal and beta-carotene, vitamin A, also called beta-carotene or pro-vitamin A, has also been shown to help promote healthy night vision, support normal bone growth and a healthy immune system.

What is the best antioxidant to take?

There is not one single antioxidant that is most effective. In order to be effective there must be a team of antioxidants all working together; therefore, the best way to fight free radicals is with a collection of antioxidants. When you supplement with a team of antioxidants, you will find that the whole is greater than the sum of its parts. That's why Oxygen Extreme works so well, as it contains a unique blend of many antioxidants.
