Why choose Prime Astaxanthin Antioxidant & Ocular Support Formula?

There are many health supplements available, but only Prime Astaxanthin Antioxidant & Ocular Support Formula gives you the highest-grade astaxanthin in its most clinically-studied amounts. It uses purest and most powerful antioxidants available. AstaReal® uses precision cultivation techniques in state-of-the-art facilities, producing only 100 percent natural astaxanthin in a purified, sterile environment.

Daily exposure to free radicals — contained within the air we breathe and the food we eat — results in ongoing, long-term physical stress. The widespread oxidative stress they cause to all systems of the body is also believed to be a primary contributor to what we call the aging process. Prime Astaxanthin works against free radicals by providing powerful antioxidant defense to help protect the entire body on a cellular level.

The power of Prime Astaxanthin to fight free radicals is of critical importance, but it must also be delivered to the body in sufficient amounts to be truly effective. Typical astaxanthin formulations contain only 2-4 mg per serving — an amount which falls short in delivering all possible benefits to your body. Prime Astaxanthin Antioxidant & Ocular Support Formula is made exclusively in a 6 mg serving, which is superior for promoting antioxidant for overall health and ocular support. Together, the quantity and the quality delivered by Prime Astaxanthin yields antioxidant benefits second to none.

FAQs:

Who should take Prime Astaxanthin Antioxidant & Ocular Support Formula?

Adults looking for a powerful antioxidant defense especially for people with insufficient antioxidants and carotenoids in their diet. Since this product is a source of antioxidants, this product helps to fight oxidative stress caused by intense exercise, so it is ideal for anyone who wants to recover from exercise. This product is also great for people who want healthy ocular health (vision).

What is the recommended serving of Prime Astaxanthin Antioxidant & Ocular Support Formula?

The recommended serving for adults over the age of 18 is one 6 mg softgel per day.
